

## Task 153:

### Create a Website for a non-profit Organization

by Chit **Sabesh** Asokan

### **Comments from the Webmaster**

Mr. Jeyaram Kadivan - Special Needs Officer, St. Gabriel's Secondary School.

I used to think that one had to painfully wade through lines of coding in order to update and change content on a website. That all changed when I was introduced to Joomla. Joomla allows me to manage the website with ease. Coming from someone with little experience in web programming, this is a big bonus!

In addition, Joomla allows me to collaborate with our school's Infocomm Club . No longer does one person have to do all the work – we can work as a team to keep the site fresh.

### **Thoughts from the Developer**

Building this website has been a great learning experience for me. One of biggest things I've learned is to always start with a plan. A brief outline or sketch on your site structure is invaluable in web development. It will give you direction and save you a lot of time.
