phpDocumentor

mosMainBody

mosMainBody displays the main body of the page, which is everything between the <body> tags. The page contents are buffered using ob_start and ob_get_contents. The content of this buffer is displayed by mosMainBody. If the request variable mosmsg is set then the message is included before the body in <div> tags, with class="message". In the future it may be possible to display the message as a Javascript alert.

Syntax

void mosMainBody ( )
Defined in

includes/template.php

(includes/frontend.php prior to Joomla 1.1)

Examples

Example: Display the main body of the page.
mosMainBody();

This will display the main body of the page.
