

Menu Item: Component [Web Links]

Last Updated Monday, 09 April 2007

Title:

com_menus - add (or edit)

Access:

menu=>Menu=>Menu Manager=>Menu Manager [menuname] - New (or Edit)

menu=>Menu=>Menu Manager [menuname] - New (or Edit)

Quick Icon=>Menu Manager=>Menu Manager [menuname] - New (or Edit)

User Level:

Manager; Administrator, Super Administrator.

Screenshot:

Edit Menu Item : Component [Web Link]

Description:

This particular Menu Item creates a shortcut to the Front-end display of the com_weblinks Component.

Toolbar:

New Menu Item Toolbar
Edit Menu Item Toolbar

Back: Click Back to return to the previous screen to select a different type of Menu Item to create the new entry from.

Save: Click Save to save any changes made during the current editing session and return to the Menu Manager [menuname] screen.

Apply: Click Apply to save any changes made so far in the current editing session but remain in the Edit Menu Item screen to continue editing. Once the editing session is complete click Save as above. If a New Menu Item was being created the screen title switches from New to Edit, and the New Menu Item will have been added to the particular Menu. The Toolbar changes to reflect the change of function and it is no longer possible to select an alternative Menu Item type.

Cancel: Clicking Cancel at any point ends the creation of a New Menu Item and returns the display to the Menu Manager [menuname] screen. Any changes made since the session commenced will be lost.

Close: Clicking Close at any point ends the current editing session and returns the display to the Menu Manager [menuname] screen. Any changes made since the session commenced, or since the last time Apply was clicked, will be lost.

Details:

Name: Enter the name that is required to appear on the Menu to identify this Menu Item.

Component: Identify the Component from the list of installed Components to which this Menu Item will create a shortcut. This will create a new Component Item. A Component Item is a variant of the Front-end display of that Component. There can be more than one representation of a Component Item, but with different Access Levels, for example.

URL: The URL will be created automatically by Joomla! when the Apply or Save icons are first clicked. The URL represents the internal link to the display element of the Component itself.

Parent Item: Select the existing Parent Item to which this Menu Item is to be associated. By default this is Top. Top is the Menu itself. The Menu Item will be visible in the normal view of the Menu. If another Menu Item is selected then this Menu Item will become a sub-Menu Item and will not be visible until the Parent is clicked.

Ordering: Control where this Menu Item will appear in its Menu, in the Front-end. Select this position from the drop-down display of current Menu Items contained in the Menu.

NOTE: By default the new Menu Item is placed at the Top of the Menu. Its position can be changed once the New Menu Item has been saved for the first time. The resulting drop down box displays all Menu Items in the Menu whether they are published or not.

Access Level: Define which of the three document Access Levels applies to this Menu Item. Select from Public, Registered, or Special.

Published: Select Yes (the default setting) to Publish this Menu Item in the Menu. This will display the Name of the Menu Item, as entered above, in the Menu.

Parameters:

Menu Image: Select a small image, from the drop down list of available images, to be placed to the left or right of the Menu Item Title in the Menu. Images must be located in `joomla_root/images/stories/` directory.

Page Class Suffix: This field can contain a suffix that is to be applied to the CSS classes of this page. This allows individual page styling with relative ease. For example, if the suffix `.wl` (short for web link) is entered here, all CSS code elements in this page will have `.wl` added to them. `h2` becomes `h2.wl`. Separate entries in the CSS file of the template would then be applied as entered.

Back Button: Set whether there is a Back navigation button inserted at the base of the target page being displayed. Options are Use Global (the setting made for the whole site), Hide, or Show. The Global site settings are overridden by these individual page settings.

Page Title: Select Show or Hide to set whether the the Page Title entered below will appear at the top of the target pages display in the Front-end of the web site.

Page Title: Enter the text that will be displayed at the top of the target page display in the Front-end of the web site. If left blank the entry defaults to the Menu Item name instead.

Table Headings: Select Show or Hide to set whether the Table Headings created by the Component will be displayed in the target page, or not.

Hits: Joomla! keeps a record of the number of times every Content Item is opened - be it a document or, as in this case, a Web Link. Select Use Global, Hide, or Show to set whether a display of the number of Hits is shown on the target page.

Link Descriptions: Select Show or Hide to set whether the description text entered for each individual Web Link, when it was created will be displayed alongside its entry in the target display page.

Category List - Section: Select Show or Hide to set whether a list of Web Link Categories is displayed in the target Section page. Selecting Hide will not show any Web Link Categories at all, whilst still displaying the target page.

Category List - Category: Select Show or Hide to set whether a list of Web Link Categories appears in each of the Category pages, as links to those target pages, or not.

Description: Select Show or Hide to set whether the description text, entered in the following field, will be displayed when this Web Link Menu item is opened.

Description Text: Enter a text description of this Web Link Category display to inform Users of the subject that is covered.. If this field is left blank Joomla! will load the data from `_WEBLINKS_DESC` in the default Language file `– languagename.php` - found in `joomla_root/language/directory`.

Image: Select an image from the drop down list of available images that will be displayed in the Web Link Category page. The image will be located at the top of the page to the left or right of the Page Title. If an image is not required select - Do Not Use - from the drop down list (default setting). Images must be stored in the joomla_root/images/stories directory.

Image Align: Select Left or Right to set whether the image chosen above is placed to the left or right of the Page Title.

Icon: Select an icon from the drop down list of available images that will be displayed alongside each Web Link Item. If no icon is needed select - Do Not Use - from the drop down list. Alternatively, select - Use Default - to use the standard Joomla! icon.
