

Site Mambot: Edit [MOS Pagination]

Last Updated Monday, 09 April 2007

Type:

com_mambots /editA

Access:

menu=>Mambots=>Site Mambots->Edit

User Level:

Administrator; Super Administrator

Screenshot:

Site Mambot: Edit

[MOS Pagination]

Description:

Mambot Type: content

File Name: mospaging.php

This Mambot is responsible for providing the page navigation within individual Content Items that are split into manageable pages using the { mospagebreak }.

The available options are:

- the { mospagebreak } that can split a single long document into smaller, better navigated items.
- the Table of Contents that can be created by extending the use of the { mospagebreak }with:
- { mospagebreak title=The page title }

- { mospagebreak
heading=The first page }
- { mospagebreak title=The page
title&heading=The first page }
- { mospagebreak heading=The first
page&title=The page title }

NOTE: Each of these settings adds a different style to the entry created in the Table of Contents and may add a suffix to the Content Title. Additional spaces have been added before and after each { or } to prevent activation of the function in this text.

Toolbar:

Save: Click Save to save any changes made during the current editing session, and return to the Mambot Manager screen.

Apply: Click Apply to save any changes made so far in the current session, but remain in the Mambot screen to continue editing. If the current action was creating a new Mambot it will now have been saved, and will appear on the Mambot Manager list. In addition, the current session now becomes an Edit action rather than the Add action it was previously. Once the editing session is complete click Save as above.

Close: Click Close at any point to end the current editing session and return to the Mambot Manager screen. Any changes made since the session commenced, or since the last time Apply was clicked, will be lost.;

Help: Click the Help icon at any time to view this Help Screen.

Cancel: Clicking Cancel at any point ends the current creation session and returns the display to the Mambot Manager screen. Any changes made since the session commenced will be lost and the new Mambot will not have been created.

Details:

Name: Enter a name for the Mambot. The name is used by the Mambot Manager to identify it in its display list of all Mambots.

Folder: Select one of the five Mambot classifications, from the drop down list, that this Mambot is to be assigned to. Once selected, and the Mambot is saved for the first time, this field is not editable.

Mambot file: Enter the name of the .php file, within the joomla_root/mambots directory, that this Mambot is created from.

Mambot Order: This is a system Mambot and cannot be reordered.

Access Level: Identify which User Group level can view this Mambot. Select from Public, Registered, or Special. See User Access Levels for further details on these.

Published: Select No or Yes to set whether the Mambot is Published.

Description:

Enter a description of the Mambot that explains its function in the open text field. The text will be displayed within the Administrator Back-end only and is for future reference purposes.

Parameters:

Site Title: Select No or Yes to set whether the Mambot title and heading attributes are added to the Site Title.
