

Chapter 4: Language Manager

Last Updated Thursday, 30 June 2005

The Language Manager allows you to maintain the installed language files for Joomla.

Installed Languages - This list shows all of the currently installed Joomla Languages with a tick next to the currently active one.

To learn how to install or uninstall a Front End language file, click this [Help Screen link](#).

[Install/Uninstall a Language or Template](#)

To learn how to edit your Front End language files, click this [Help Screen link](#).
